

Cisco VPN

A. Install Cisco VPN Client

- Open a browser, go to <https://ssl.laurentian.ca> , login with your MIRARCO email id.
- On the left panel, click on

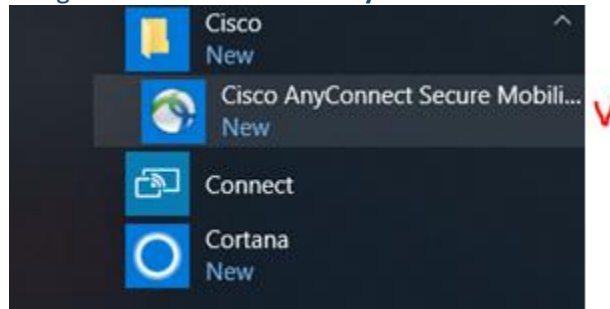

To download and install Cisco VPN Client (file looks like: anyconnect-win-4.5.04029-core-vpn-webdeploy-k9.exe)

B. How to connect to MIRARCO server via VPN:

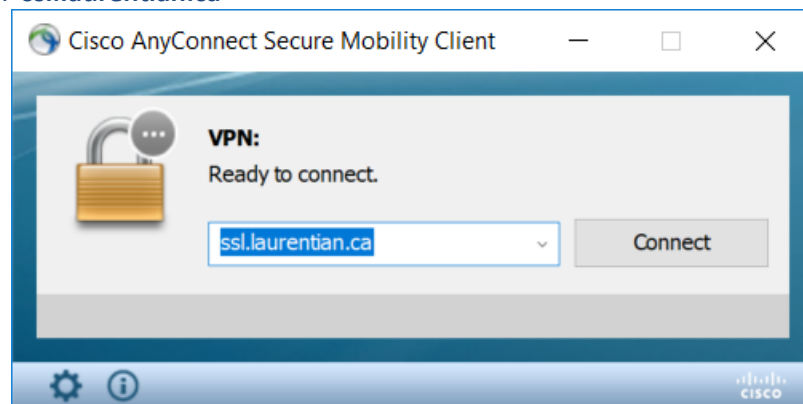

Assuming Cisco AnyConnect Client is installed.

Following steps below to run the program to connect to MIRARCO server:

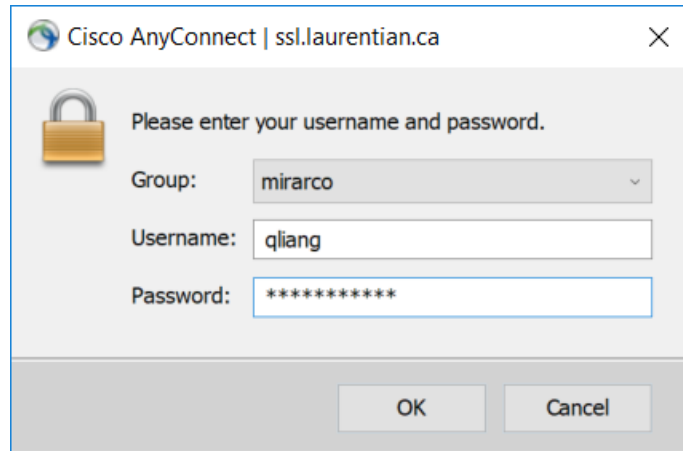

- Click on  ->All Program -> Cisco -> **Cisco AnyConnect Secure Mobility Client...**

- Enter
1) Hostname: **ssl.laurentian.ca**

- 2) Click on  button
- 3) Once the login screen pops up, from the dropdown list select Domain: **mirarco**
- 4) Enter your username and password

Once you connected to VPV, you should see the Lock-mark on the bottom-right corner,

Now you can use:

- 1.2. <http://deltek.mirarco.org> for logging your time
- 1.3. To access to server at: <\\mir-serv>
- 1.4. Printing on Xerox printer
